

NitroJection Recertified Gas Assist Controllers

Save up to 50%

NitroJection's Recertified Equipment line is the most cost effective approach for injection molders to add gas assist technology for the first time or to expand their current processing capacity. Many popular gas assist models from Alliance, Bauer and Cinpres can now be purchased with savings up to 50% off the cost of a new system. Our recertified equipment is thoroughly inspected, pressure checked, calibrated, and repaired as required. They are then recertified to perform to their original specifications. All Recertified NitroJection systems include a 90 day limited warranty and can be serviced by NitroJection electrical, pneumatic and programming experts.

Recertified and Ready to Ship!
